Mr Anton Booyse

**RE: PROVISION AND INSTALLATION OF A VOCATIONAL EDUCATION AND TRAINING
MANAGEMENT INFORMATION SYSTEM FOR THE NAMIBIA TRAINING AUTHORITY**

The above project has reference.

I would like to take this opportunity to thank you and your team for the most efficient and effective way in which you have conducted the provision and installation of the Vocational Education and Training Management Information System for the Namibia Training Authority. The product, expert support and assistance from the start of the project, during and recommendations at close-out, additional support at our request and continued technical support resulted in the automation of the business processes of the NTA within the agreed timeframes and deliverables framework.

With the system being operational the NTA is in a position to monitor, evaluate, collate and provide information, perform work processes and provide services to the VET market in a more effective and efficient manner. As a result of the system, continual review of business processes and workflow takes place on a daily basis for continual improvement and enhancement purposes.

The NetSys system rolled out to training providers adds value in moving towards accurate statistic generation for enrolment and national reporting purposes and has provided a learner management system for providers to use resulting in them moving towards compliance in one component for the purposes of registration and/or accreditation.

Your strict adherence to due dates and deliverables ensured that the project was finalised according to the project plan and all objectives met and even exceeded some expectations.

I wish you and your team great success in the future and many thanks for the expertise, assistance and business acumen provided.

Yours sincerely,

Arthea Diergaard

Project Coordinator: CPD
